

i-H₂O™

INTELLIGENTLY 2 DESIGNED WATER

The patented i-H₂O Activation System is the most profound hydration technology available today. This easy-to-use wellness breakthrough allows you to transform ordinary, filtered water into ultra-hydrating, "living water" within 30 minutes. During the automated i-H₂O Activation process, the chaotic structure of water molecules is transformed into a single-file alignment, mimicking our body's own natural state of healthy cell water, thus creating optimally energized, bio-available water. *

*"I have been drinking i-H2O for several months and I have experienced some very positive changes. When drinking i-H2O while exercising, I feel much better hydrated than in the past. I also feel like I am recovering much more quickly from strenuous workouts. Also, before i-H2O I often felt dehydrated during the night and I had to get up to drink a glass of water. With i-H2O, I am now sleeping through the night and I don't wake up thirsty. Overall the i-H2O has made a very noticeable impact on my sense of well-being."**

FREQUENTLY ASKED QUESTIONS

Q. Why is the i-H2O's "single-file aligned" structure so important?

A. When we are born, the water molecules in our cells are aligned in a single-file. Our young body even converts any water we drink into that necessary single-file structure. But as we age, our body's ability to convert the water we drink into the single-file alignment dramatically decreases and our body's hydration levels become increasingly compromised. Also, Nobel Prize winning research from the early 2000's proved that in order for water to be optimally effective in the body, the water molecules must be aligned in a single-file structure.

Q. Can I activate the water more than 30 minutes?

A. The optimal activation is 30 minutes. You will not get additional energy absorption by activating for longer than 30 minutes.

Q. Will i-H2O change water's pH?

A. i-H2O helps support the body's natural pH balancing process.

Q. Can we use the i-H2O Activation System for cooking or activating other liquids?

A. Yes, you can use it for cooking and you can activate water, milk, juice or any liquid - including wine, coffee and tea.

Q. Can I wash fruits and vegetables with the i-H2O?

A. Yes, i-H2O has shown to keep washed vegetables and fruits fresher for a longer period of time in the refrigerator.

Q. Can i-H2O be refrigerated?

A. Yes. You can store i-H2O in the refrigerator or at room temperature.

Q. Is it beneficial to spray i-H2O on my face or body and if so, what benefits could I expect from doing so?

A. Yes, it is absolutely beneficial to spray i-H2O water on your face and/or skin. Our skin is the largest organ our body has. Because of that characteristic, the skin has qualities that make it more resistant in some regards than other organs. However, when faced with chemical exposures, as well as physical exposures like heat and cold, plus biological exposures like viruses, bacteria, or even electropollution, it is critically important that skin is optimally hydrated and nourished.
